

## Textbook Unit 7 Lesson 6 Answers

1. a) Heads or tails are equally likely to occur.
4. Player B is more likely to win the game since there are more odd numbers on the spinner.
5. Both players have an equal chance to win since their colors occupy the same amount of space on the spinner.
6. Player B is more likely to win the game since they have four successful outcomes and Player A only has two successful outcomes.
7. Spinner B most likely has the results of 60 blue and 40 red since that spinner has more blue space than red space on it.
